Featuring the following Giants of Bass:

- James Jamerson | Carol Kaye | Duck Dunn | Rocco Prestia
- Jaco Pastorius | John Paul Jones | Jack Bruce | John Entwistle | Paul McCartney
- Larry Graham | Stanley Clarke | Bootsy Collins | Bernard Edwards

Fuller writes words as if they are variable equations, along with some other very important information from say the likes of Robert Keyosaki, this book will really have you thinking about why finance is in the state it is! Perhaps it is my own limited vocabulary but I found this book to be very difficult to understand and follow. The book was a little too technical for me, although I was intrigued with the information. A very distinguished life or a lot was done to positively impact the world that you live in today his thoughts are deep and a bit mind bogging but well worth engaging with Fantastic book, but could benefit from being a little more "haiku" than essay. Overall the book was definitely worth it. Just waiting for the author to make his points is painful, some time it's happen when there is a broken download link. The subject interested me so made it through. The unnecessarily conjoined words also don't help to communicate the ideas. Jared to focus on what he is saying. He is best known for inventing the geodesic dome; his design has been used in structures all over the world. We request all the user if you unable to download the book GRUNCH OF GIANTS - R. content is awesome, but the narrator on this one was a little dull. A man truly ahead of his time. This book had some insights that helped me understand the elites system. In 1968 he was elected into the National Academy of Design as an Associate member. He was generations ahead of his time and his works transcend time. So true about how the world is being controlled. But the reading seems performed by a reading robot almost-impossible-to-cope-with-the-word-silence-word intonation!!!! very bad audio. This was highly regarded from a different author and has
